

Get ready for
something great.
Start with
your smile.

Invisalign – the world’s most advanced clear aligner system. Made to move you forward.

When we pioneered the world’s first clear aligners, we changed so much more than how people straighten their teeth.

Each feature is designed to reveal the smile that you deserve.

Because it’s not just your smile that’s full of potential.

Removable

Comfortable

Nearly invisible

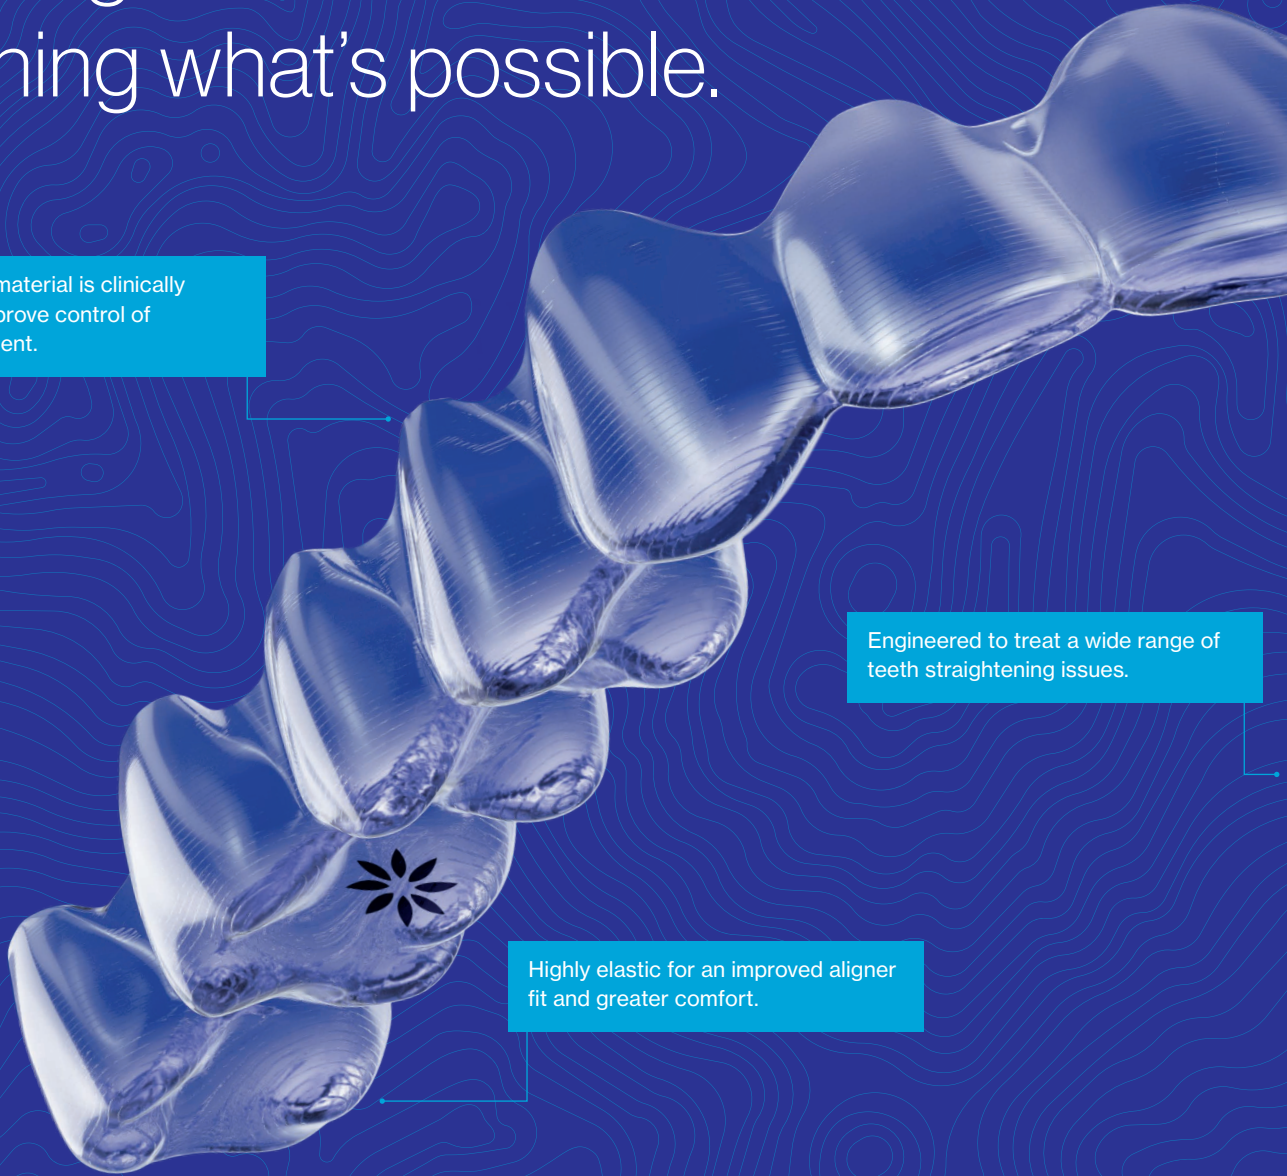

Invisalign innovations. Pushing what's possible.

SmartTrack material is clinically proven to improve control of tooth movement.

Engineered to treat a wide range of teeth straightening issues.

Highly elastic for an improved aligner fit and greater comfort.

Just like you, we're always
moving forward.

Millions of people are seeing the possibilities that Invisalign innovations open up.

Moves like no other

Only Invisalign clear aligners use SmartTrack® material to shape your smile with such precision, comfort and predictability.

Made for your mouth

Each set of aligners is custom-made using state-of-the-art 3D printing technology, moving your teeth gently and efficiently.

The complete experience

ClinCheck® technology digitally maps your entire Invisalign journey, so Invisalign patients can see what their new smile is predicted to look like before treatment even begins.

Three steps forward. No steps back.

The Invisalign treatment process is as straightforward as it is technically advanced.

1

Once your Invisalign Provider has confirmed that you are eligible for treatment, they will take photos, X-rays and digital scans, or a dental impression, of your teeth. These records will be used to create a ClinCheck 3D treatment plan, just for you.

2

After being custom-made and shipped to your Provider's office, you'll receive a series of aligners to wear every day and change at home – on average every 1-2 weeks.

3

You'll visit your Provider around every 6-8 weeks to monitor progress and receive new aligners. After finishing your treatment plan, retainers will be required to maintain your new smile.

A man and a woman are sitting at a table in a restaurant or cafe, smiling and looking at each other. The man is on the left, wearing a teal shirt, and the woman is on the right, wearing a plaid shirt. They are both smiling broadly, showing their teeth. In the foreground, there is a white takeout container with food and a small red cup. The background is a wooden wall with shelves holding various items like a stack of magazines and a coffee maker.

Made to move your life.
Not disrupt it.

Life can continue as normal,
as the Invisalign System
discreetly does its work.

You can comfortably wear your aligners
for the recommended 22 hours a day.
And because the aligners are removable,
it's easy to maintain your regular oral hygiene
and enjoy your usual diet.

As you progress, replacing your aligners every
1-2 weeks, people may notice a gradual
change in your smile.

What if you stopped wondering 'what if'?

There's never been a better time to join millions of people who've embraced their future with a smile.
